

# Hybrid Electric City Bus

This hybrid electric bus is designed for urban transportation. It features a low-floor design and spacious interior.

## Overview

### Hybrid Electric City Bus

This hybrid electric city bus is engineered for efficient urban transportation, combining a diesel engine with an electric motor to reduce emissions and optimize fuel consumption. Designed with a low-floor configuration, it ensures easy accessibility for all passengers while maintaining a spacious, comfortable interior. The vehicle features a modern aesthetic with large windows for enhanced visibility and is equipped with advanced safety systems, including ABS and ESC, to ensure reliable performance in city environments.

## Performance & Powertrain
