

Hybrid Electric Scooter with Extended Range

This hybrid electric scooter provides extended range compared to standard electric bikes. Its hybrid system allows for low emissions and efficient energy use, with modular design for easy maintenance.

Product Overview

Designed for Efficient Urban Mobility

This hybrid electric scooter offers a versatile solution for urban transport, combining ease of use with passenger comfort. Featuring a robust step-through frame, it includes a convenient front basket and an ergonomic rear seat with backrest for daily commuting. Its balanced blue and white aesthetic makes it a stylish choice for professional urban settings.
