

Hybrid Windshield Wiper Blade for BMW X3 (2011-2016)

This hybrid wiper blade is designed for universal cars, with optional sizes and adapters available for 98% of vehicles. Its graphite-coated rubber reduces friction and noise, while the curved high-carbon steel design ensures smooth wiping performance across a temperature range of -50 to 70 .

Product Overview

Hybrid Performance Wiper Blade

Engineered for optimal visibility, these hybrid wiper blades combine the structural strength of traditional frames with the aerodynamics of frameless designs. They feature graphite-coated rubber for silent operation and high-carbon steel backing for a smooth, consistent wipe. Designed for durability, they perform reliably in diverse weather conditions across a wide temperature range.

Technical Specifications

Operating Temperature

-50

Min Temperature

70

Max Temperature

Available Size Range

11 - 28 inches

Refill Material Options

Natural Rubber, Silicone

Compatibility & Installation

Installation Type

Easy Install

Vehicle Compatibility

BMW X3 (2011-2016)

Design Features

Core Features

- Graphite coated rubber to reduce friction and noise
- High carbon steel frame for consistent pressure
- Hybrid design for all-weather performance
- Aerodynamic profile for smooth wiping
