

Hydraulic Air Bottle Jack for Heavy Lifting

Hydraulic air bottle jacks are designed for heavy-duty lifting. These jacks combine hydraulic power with pneumatic assistance for efficient and reliable performance.

Product Overview

Heavy-Duty Hydraulic Air Bottle Jack

These hydraulic air bottle jacks are engineered for demanding heavy-duty lifting applications. By combining robust hydraulic power with pneumatic assistance, they provide efficient and reliable performance across various industrial and automotive environments. Designed for safety and ease of use, they feature integrated air motors and precise control mechanisms to ensure stability during operation.

Performance Specifications

Available Models

- MG03-12Q
- MG03-20Q
- MG03-30Q

Lifting Capacity

12 ton

MG03-12Q Capacity

20 ton

MG03-20Q Capacity

30 ton

MG03-30Q Capacity

Key Features

Typical Applications

Automotive Repair • Industrial Settings • Construction Sites

Design Highlights

- Robust construction
- Integrated air motor
- Precise control mechanisms

Certifications
