

Hydraulic Anchor Windlass for Marine Vessels

This hydraulic anchor windlass is designed for 81/84 chains. It features a working load of 311.7/335.2 KN and a supporting load of 2171/2320KN.

Overview

Heavy-Duty Hydraulic Anchor Windlass

This hydraulic anchor windlass is engineered for demanding marine environments, providing reliable and efficient anchoring and mooring operations. Built for robust performance, it features a powerful hydraulic system and durable construction suitable for commercial vessels, offshore platforms, and large yachts. The system ensures smooth, controlled operation when handling large anchors and chains.

Technical Specifications

Chain Diameter	81/84 mm
Working Load	311.7/335.2 KN
Supporting Load	2171/2320 KN
Working Speed	9 m/min
Warping Load	140 KN
Hydraulic System Rating	110 kW

Certifications

Authorized Classifications	CCS, LR, GL, RS
