

Hydraulic Bottle Jacks

Hydraulic bottle jacks are designed for heavy-duty lifting applications in metallurgy and construction. These jacks provide reliable vertical lifting power for machinery maintenance, equipment installation, and structural support.

Overview

Heavy-Duty Hydraulic Lifting Solutions

These hydraulic bottle jacks are engineered for demanding lifting applications within metallurgy, construction, and heavy machinery maintenance. Designed for reliable vertical force, they provide essential support for equipment installation and structural adjustments. With robust construction, these tools are built to handle rigorous industrial environments safely and efficiently.

Performance

Lifting Capacity

10 Ton

Standard Capacity

20 Ton

Heavy-Duty Capacity

Applications

Primary Use Cases

Metallurgy, Construction, Machinery Maintenance, Equipment Installation, Structural Support

Features

Operation Type

Hydraulic • Vertical Lifting
