

Hydraulic Clutch Cylinder for Automotive

This hydraulic clutch cylinder is designed for automotive applications. It transmits force from the clutch pedal to the clutch release mechanism, enabling smooth gear changes.

Overview

Hydraulic Clutch Cylinder

This hydraulic clutch cylinder is engineered for precise automotive clutch system performance. It effectively transmits force from the clutch pedal to the release mechanism, ensuring smooth and reliable gear transitions. Built with a robust metal housing and protective components, it is designed to withstand demanding operational conditions.

Technical Details

Part Code	X0008
Construction Features	Metal Housing, Protective Rubber Boot, Integrated Push Rod
Hydraulic Connectivity	Yes
