Product Overview

Hydraulic Clutch Master Cylinder

This hydraulic clutch master cylinder is designed to provide reliable clutch actuation in automotive applications. It is a critical component responsible for transmitting force from the clutch pedal to the clutch release mechanism. Featuring a precision-machined bore and robust construction, it ensures smooth and consistent operation for manual transmission vehicles.

Technical Specifications

Bore Size	0.625 inch
OE Number	3141026170

Design Features

Construction

- Black-finished durable body
- Adjustable clevis on pushrod
- Integrated fluid inlet and outlet ports
- External reservoir connection point
