Product Overview

High-Efficiency Hydraulic Pile Breaking

The PB series hydraulic pile breaker utilizes an advanced modular design to deliver efficient, precise concrete pile cutting. By employing a fully hydraulic synchronous action, the system ensures clean breaks without damaging the pile body or surrounding equipment. This versatile tool is engineered for durability, offering a service life of up to 20 years while significantly reducing construction costs and labor requirements.

Technical Specifications

Pile Diameter Range	200 mm
Maximum Pile Diameter	2500 mm
Expected Service Life	20 years

Key Features

Maintenance & Design

- Easy module replacement
- Hinge connection for quick disassembly
- Simplified operating system
- Reduced manual cleaning requirements

Operational Advantages

Modular Design, Low Noise Operation, Synchronous Hydraulic Action, Quick Assembly, Multi-Terrain Compatible
