

# Hydraulic Cylinder for Agricultural Machinery

This hydraulic cylinder is designed for robust performance in agricultural machinery applications. It features a durable steel construction, precision-honed barrel, and chrome-plated piston rod for extended service life.

## Product Overview

### Heavy-Duty Hydraulic Performance

This hydraulic cylinder is engineered for robust performance in demanding agricultural machinery applications. Constructed with a durable steel build, it features a precision-honed barrel and a chrome-plated piston rod to ensure an extended service life. It is designed for seamless integration with a wide variety of agricultural equipment requiring reliable linear actuation.

## Technical Specifications

### Key Features

- Precision-honed barrel
- Clevis mounts for easy installation
- Secure attachment points

### Compatibility

Suitable for all types of tractors

### Construction Materials

Steel Construction, Chrome-plated Piston Rod
