

Hydraulic Cylinder for Tipper Trucks

This hydraulic cylinder is designed for use in tipper trucks and similar construction machinery. The cylinder is engineered for optimal force and stroke length, ensuring efficient operation of the truck's lifting and tilting mechanisms.

Product Overview

Heavy-Duty Hydraulic Performance

This hydraulic cylinder is engineered specifically for demanding applications in tipper trucks and heavy construction machinery. Built with robust materials and high-quality seals, it ensures reliable, consistent performance under high-pressure conditions. Precision-machined components facilitate smooth lifting and tilting operations while minimizing long-term wear and tear.

Technical Specifications

Operational Benefits

- Optimized force and stroke length
- Smooth and consistent movement
- Reduced wear and tear
- Reliable performance in demanding environments

Primary Application

Tipper Trucks, Construction Machinery

Key Features

Heavy-duty construction, High-pressure actuation, Precision-machined, High-quality seals
