

Hydraulic Disc Brake Pads for Bicycles

These high-performance hydraulic disc brake pads are designed for bicycle braking systems. The pads provide reliable stopping power and consistent performance in various riding conditions.

Product Overview

High-Performance Hydraulic Disc Brake Pads

These hydraulic disc brake pads are engineered for reliable stopping power and consistent performance across diverse riding conditions. Featuring a durable friction material bonded to a precision-engineered steel backing plate, they offer excellent heat dissipation and significantly reduced brake fade. Designed for easy installation, these pads are compatible with a wide range of hydraulic disc brake calipers found on mountain, road, and e-bikes.

Technical Specifications

Backing Plate Material	Stainless Steel
Key Design Features	Heat Dissipation, Lightweight Cutouts, Reduced Brake Fade, Easy Installation

Compatibility

Compatible Bike Types

- Mountain Bikes
- Road Bikes
- E-Bikes
