

Hydraulic Double Drum Mooring Winch

This hydraulic mooring winch features a double drum design for increased line capacity and operational flexibility. It is constructed with robust materials suitable for harsh marine environments, ensuring reliable and precise control for mooring operations.

Overview

Heavy-Duty Marine Mooring Solution

This hydraulic double drum mooring winch is engineered for demanding marine environments, offering robust construction and reliable performance. The double drum configuration provides increased line capacity and operational flexibility, making it an ideal choice for various vessel types. Designed for precision and safety, this equipment ensures efficient mooring operations under diverse conditions.

Technical Specifications

Model Range

- 2YB-30/0.25
- 2YB-400/0.13

Drive Type

Hydraulic

Configuration

Double Drum

Application

Marine, Mooring, Deck Machinery
