

Hydraulic Excavator, 0.9 M³ Bucket Capacity, 108kW Engine

This hydraulic excavator has an engine rated power of 108kW and an operating weight of 21000kg. It is designed for excavation and construction tasks and features a bucket capacity of 0.9M³.

Overview

High-Performance Hydraulic Excavator

This heavy-duty hydraulic excavator is engineered for demanding construction and excavation environments. With a robust 108kW engine and a 0.9 cubic meter bucket capacity, it delivers the power and efficiency required for large-scale earthmoving tasks. Its 21,000kg operating weight ensures stability and durability, making it a reliable asset for professional job sites.

Technical Specifications

Rated Engine Power

108 kW

Rated Power

Operating Weight	21000 kg
Bucket Capacity	0.9 m ³

Machine Features

Primary Applications	Excavation, Construction, Earthmoving
