Overview

Robust Hydraulic Excavator

The KY70D hydraulic excavator is a robust construction machine engineered for demanding digging, trenching, and material handling tasks. It features a powerful hydraulic system designed for efficient operation and a durable chassis that ensures stability on various terrains. With a focus on operator comfort and site reliability, this machine provides consistent performance for diverse construction environments.

Performance Metrics

Model Designation	KY70D
Primary Applications	Digging, Trenching, Material Handling

Key Features

Design Highlights

- Powerful hydraulic system
- Durable chassis for stability
- Comfortable operator cabin
