

Hydraulic Excavator for Heavy Construction

This hydraulic excavator is designed for heavy-duty construction and mining applications. It features a powerful engine, advanced hydraulic system, and durable construction for maximum productivity and reliability.

Overview

High-Efficiency Hydraulic Excavator

This hydraulic excavator is engineered specifically for rigorous mining and heavy construction environments. It delivers a 10% increase in work efficiency alongside a 10% reduction in fuel consumption for superior productivity. Built for durability, the unit features an extensive 25,000-hour design life and is optimized for low-cost, convenient maintenance.

Performance

Efficiency Improvement	10 %
Consumption Reduction	10 %

Durability

Design Lifetime	25000 hours
Component Pressure Reduction	15 %

Maintenance

Maintenance Expense Savings	50 %
-----------------------------	------

Features

Working Device Compatibility

- More than 20 optional working devices

Engine Protection	Multiple filtration system, Independent oil radiator
