

Hydraulic Floor Jack for Vehicle Lifting

This heavy-duty hydraulic floor jack is designed for lifting vehicles. It features durable steel construction and a wide base for stability, along with a safety overload system.

Product Overview

Professional Hydraulic Floor Jack

This heavy-duty hydraulic floor jack is engineered for reliable vehicle lifting in professional automotive repair and maintenance environments. Constructed from durable steel, it features a wide base for enhanced stability during operation. The unit includes a built-in safety overload system to ensure operational security and prevent lifting beyond its rated capacity.

Technical Specifications

Lifting Capacity

3 TON

Rated Capacity

Product Weight

28 KGS

Features

Key Features

Heavy-duty steel construction, Safety overload system, Wide base for stability, Hydraulic operation

Application

Recommended Use

- Automotive repair shops
- Vehicle maintenance facilities
- Professional garage environments
