

Hydraulic Floor Jack for Vehicle Lifting

This hydraulic floor jack is designed for lifting vehicles. It features durable steel construction, heavy-duty wheels for easy maneuverability, and a long handle for convenient pumping action.

Product Overview

Professional Hydraulic Floor Jack

This hydraulic floor jack is engineered for reliable and stable vehicle lifting in automotive repair environments. Constructed from durable steel, it offers the structural integrity required for heavy-duty maintenance tasks. Designed with high-mobility wheels and an extended handle, it ensures efficient maneuverability and convenient pumping action for professional technicians.

Technical Specifications

Material	Durable Steel
Available Models	TH33001, TH33003

Features

Core Features

- Heavy-duty wheels for easy mobility
- Long handle for effortless pumping
- Stable lifting platform
- High-strength steel construction

Primary Application

Automotive Maintenance • Vehicle Repair
