

Hydraulic Flow Control Valve with Brass Construction

This hydraulic control valve is designed for precise regulation of fluid flow in industrial applications. Constructed from durable brass, it features multiple ports and an adjustment knob for manual pressure or flow control.

Product Overview

Precision Hydraulic Control

This hydraulic flow control valve is engineered for the precise regulation of fluid flow in demanding industrial applications. Constructed from durable brass, the unit offers excellent corrosion resistance and long-term reliability. Its compact design features multiple ports, providing versatile connection options for various system configurations, while the integrated adjustment knob allows for easy manual control.

Physical Properties

Construction Material	Brass
Design	Compact, multi-port

Operational Features

Control Method	Manual adjustment knob
Applications	Industrial Flow Regulation, Hydraulic Systems, Fluid Control
