

Hydraulic Gear Pump

This high-performance gear pump is designed for demanding industrial applications. It features a robust cast iron housing and precision-machined gears for efficient and reliable fluid transfer.

Overview

High-Performance Hydraulic Gear Pump

This positive displacement gear pump is engineered for demanding industrial fluid transfer applications. Featuring a robust cast iron housing and precision-machined gears, it ensures reliable performance and long service life. Its compact, flanged design allows for easy integration into existing hydraulic and lubrication systems.

Technical Specifications

Pump Type	Positive displacement gear pump
Housing Material	Cast iron
Connection	Flanged
Safety Features	Pressure relief valve, Overload protection

Applications

Compatible Fluids

- Oils
- Lubricants
- Chemicals

Primary Applications

Hydraulic systems • Lubrication systems • Fluid transfer
