

Hydraulic Gear Pump

This hydraulic gear pump is a positive displacement pump designed for hydraulic systems. It features robust construction and is suitable for various industrial applications.

Product Overview

Hydraulic Gear Pump Series

The GC and GL series hydraulic gear pumps are robust, positive displacement units designed for efficient fluid transfer in diverse industrial environments. Engineered for reliability, these pumps are suitable for delivering non-corrosive lubricating oils or equivalent liquids free of solid particles and fibers. Their durable construction and versatile mounting options make them an ideal solution for consistent fluid handling across various industrial applications.

Technical Specifications

GC Series Performance Data

Model	Inlet/Outlet (inch)	Discharge (L/min)	Power (kW)	Weight (kg)
GC-13	1/2"	21	0.2	4
GC-20	3/4"	37	0.4	6
GC-25	1"	55	0.75	11
GC-35	1 1/4"	121	1.5	22
GC-40	1 1/2"	212	2.2	23
GC-50	2"	242	3	45
GC-80	3"	456	5.5	82

GL Series Performance Data (50Hz)

Model	Inlet/Outlet (inch)	Discharge (L/min)	Power (kW)	Weight (kg)
GL-13-5	1/2"	18	0.4	8
GL-13-10	1/2"	31	0.75	8.5
GL-20-5	3/4"	48	1.5	9
GL-20-10	3/4"	73	2.2	11
GL-25-5	1"	95	2.2	21
GL-25-10	1"	150	3.7	23

Suitable Applications

Non-corrosive lubricating oil, Industrial fluid transfer, Hydraulic systems

Logistics & Services

Included Services

- Quality assurance during production
- Secure packaging for transportation
- On-time delivery management
- Sea freight management to destination port
- After-sales service support

Packaging

Packed inside the carton
