Overview

Professional Hydraulic Hand Pump

The BH-70 series hydraulic hand pumps are engineered for high-pressure applications, specifically designed to power crimping heads with ease. These pumps feature a durable construction with a long handle for enhanced leverage, ensuring consistent performance during lifting, pressing, and spreading tasks. Their compact and portable design makes them an ideal choice for maintenance, construction, and automotive professionals requiring reliable hydraulic power on the go.

Technical Specifications

Model Comparison

Model	Weight	Storage Case
BH-70B	10.1kg	Metal carry case
BH-70D	5.6kg	Plastic carry case

Application

Compatibility	Suitable for all compatible crimping heads and various hydraulic cylinders.
Primary Use Cases	Crimping, Lifting, Pressing, Spreading, Maintenance, Construction

Package Contents

What's in the Box

- Hydraulic Hand Pump (BH-70B or BH-70D)
- Manual
- Carry Case (Metal for BH-70B, Plastic for BH-70D)

Design Features

Build & Ergonomics

- Long handle for enhanced leverage
- Quick-connect hydraulic hose fitting
- Durable red and black finish
- Compact design for portability
