

Hydraulic Hole Puncher Kit

This hydraulic punch driver kit is designed for punching holes in mild steel, stainless steel, aluminum, and plastic. The kit includes a hydraulic pump, cylinder, draw studs, and an assortment of punches and dies of various sizes.

Product Overview

Professional Hydraulic Punch Driver Kit

This high-performance hydraulic hole puncher kit is designed for precision work in industrial applications. It is engineered to punch clean, accurate holes in materials ranging from mild steel and stainless steel to aluminum and plastic. Ideal for professionals in electrical, plumbing, and HVAC fields, the kit includes a comprehensive set of pumps, cylinders, and dies for versatile field use.

Technical Details

Included Components

- Hydraulic pump
- Hydraulic cylinder
- Draw studs
- Assorted punch and die sets

Supported Materials

Mild Steel, Stainless Steel, Aluminum, Plastic

Applications

Primary Applications

Electrical • Plumbing • HVAC
