

Hydraulic Hole Puncher

This hydraulic hole puncher is designed for punching clean, burr-free holes in mild steel, aluminum, fiberglass, and plastic. It features a compact hydraulic pump and cylinder, allowing for easy operation in tight spaces.

Product Overview

Professional Hydraulic Hole Punching Solution

This hydraulic hole puncher is engineered to deliver clean, burr-free holes across a variety of materials including mild steel, aluminum, fiberglass, and plastic. Featuring a compact hydraulic pump and cylinder design, it offers exceptional maneuverability and ease of use in confined work environments. The comprehensive set includes multiple punch and die options, making it a versatile tool for electrical, plumbing, and HVAC installations.

Technical Capabilities

Primary Applications

- Electrical installations
- Plumbing systems
- HVAC maintenance and installation

Compatible Materials

Mild Steel, Aluminum, Fiberglass, Plastic

Design Features

Key Features

Compact Design • Burr-free Punching • Portable Hydraulic Pump • Multi-size Die Set
