

# Hydraulic Hose Assembly for Fluid Power

This hydraulic hose assembly is engineered for high-pressure fluid power applications. The durable rubber is reinforced with braiding and features steel end fittings for secure, leak-free connections.

## Overview

### High-Performance Hydraulic Solutions

This high-pressure hydraulic hose assembly is engineered specifically for demanding fluid power applications. Constructed from durable rubber and reinforced with high-tensile braiding, it ensures reliable performance and longevity in harsh environments. Designed with precision-machined steel end fittings, this assembly provides secure, leak-free connections suitable for agricultural machinery and industrial equipment.

## Technical Specifications

### Compatible Fluids

- Hydraulic Oils
- Lubricants

### Compatibility

Tractors, Agricultural Machinery, Industrial Equipment

## Construction & Design

### Materials

Durable Rubber • High-Tensile Braiding • Precision-Machined Steel

### Connection Type

Steel end fittings
