

Hydraulic Log Splitter

This log splitter is a robust machine designed for splitting logs efficiently and safely. It features a hydraulic cylinder powered by a high-pressure pump, providing ample force to split various types of wood.

Product Overview

Professional Hydraulic Log Splitter

This high-performance hydraulic log splitter is designed for efficient and safe timber processing. Featuring a robust structure, it provides significant splitting force suitable for demanding commercial and residential tasks. The unit offers versatile operation with both horizontal and vertical working positions, ensuring adaptability for various log sizes.

Performance

Performance Metrics

22 tonne

Maximum Force

55 hp

Max Tractor Requirement

Technical Specifications

Physical Dimensions

Dimension	Value (mm)
Length	490
Width	1300
Height	1940

Operational Features

Key Operational Details

- Hydraulic operation system
- Cat-1 3-point linkage compatibility
- Horizontal and vertical working positions
- 190kg to 210kg structural weight range
