

Hydraulic Material Baling Press

This hydraulic pressure packing machine efficiently compresses and packages materials using adjustable hydraulic power. It is suitable for textiles, fibers, and recyclables, featuring automated cycling, adjustable pressure settings, and safety interlocks for durable, long-term performance.

Product Overview

Hydraulic Material Baling Press

This industrial-grade hydraulic baling press is engineered for efficient material compression, transforming loose waste into compact, uniform bales. Designed for versatility, it is suitable for processing textiles, fibers, and various recyclable materials, significantly optimizing storage space and transportation logistics. Built for durability and consistent performance, this machine features robust construction, adjustable pressure settings, and safety interlocks to ensure reliable operation in demanding environments.

Technical Specifications

Model Comparison

Model (Force)	Power (KW)	Dimensions (mm)	Template Size (mm)	Weight (kg)
30T	7.5	1520x1140x3030	900x600x900	1650
50T	11	1520x1300x3200	900x650x1000	2250
80T	15	1600x1300x3100	1000x650x1000	2500
100T	18	1600x1400x3450	1000x700x1050	3500

Key Features

Operational Capabilities

- Adjustable pressure settings
- Automated cycling
- Safety interlocks
- Robust construction

Suitable Materials

Textiles, Fibers, Recyclables
