

Hydraulic Material Compaction Machine

This hydraulic compaction machine is designed for compressing and packaging materials. It features a robust hydraulic system for efficient compression.

Product Overview

High-Efficiency Hydraulic Compaction

This hydraulic pressure packing machine is engineered for robust material compression and packaging operations. Designed to handle diverse industrial needs, it utilizes a powerful hydraulic system to ensure efficient and consistent compaction. The machine is an ideal solution for facilities requiring reliable high-pressure processing capabilities.

Technical Specifications

Compaction Capacity

200 kg/h

Minimum Throughput

500 kg/h

Maximum Throughput

Hydraulic Power Rating

257-2001

Equipment Ecosystem

Compatible Machinery

- Large-Sized Crusher
- Crusher for Plastic
- Film Crusher
- Crusher for Pipe or Thick Material
- Compressing Pellet Machine

Available Equipment Series

Hydraulic Packing, Crusher Series, Pelletizing
