

# Hydraulic Metal Sheet Cutting and Bending Machine

This hydraulic shearing machine is designed for cutting and fold-bending metal sheets. It features a robust construction with hydraulic cylinders for powerful cutting action and a control panel for precise operation.

## Product Overview

### High-Performance Metal Processing

This hydraulic shearing machine is engineered for efficient cutting and fold-bending of metal sheets. It features a robust construction integrated with powerful hydraulic cylinders to ensure precise cutting action. The system includes a dedicated control panel for accurate parameter adjustments, alongside advanced safety features and a material support system to streamline workflow.

## Technical Capabilities

### Key Features

- Robust hydraulic cylinder system
- Precision control panel
- Adjustable cutting parameters
- Integrated material support system
- Advanced safety mechanisms

### Primary Functions

Metal Cutting, Fold-Bending, Hydraulic Shearing

## Operational Metrics

### Performance Metrics

**2004**
