

Hydraulic Metal Sheet Cutting and Bending Machine

This hydraulic shearing machine is designed for cutting and fold-bending metal sheets. It features a robust construction and a control panel for operation and adjustment.

Overview

Versatile Metal Fabrication Solution

This hydraulic shearing machine is engineered for precision cutting and fold-bending of metal sheets. Featuring a robust, heavy-duty construction, it is designed to withstand demanding industrial environments. The integrated control panel allows for streamlined operation and easy adjustments, making it an essential tool for high-efficiency metal fabrication tasks.

Performance Specifications

Max Cutting Thickness	6 mm
Max Cutting Length	3200 mm
Model Designation	QC11Y-6x3200

Key Features

Design Highlights

- Robust heavy-duty construction
- Integrated control panel for precision operation
- Adjustable settings for varied material requirements

Primary Functions	Hydraulic Shearing, Fold-Bending, Metal Sheet Processing
