

Hydraulic Metal Sheet Shearing and Bending Machine

This hydraulic shearing machine is designed for cutting and fold-bending metal sheets. It features a robust frame, precision cutting blades, a hydraulic power system and an adjustable back gauge for accurate cuts.

Overview

Precision Metalworking Solution

This hydraulic shearing and bending machine is engineered for high-precision metal sheet processing. Featuring a robust frame and advanced hydraulic power system, it ensures consistent performance for demanding industrial applications. The unit includes an adjustable back gauge and an intuitive control panel, allowing operators to set precise parameters for both cutting and fold-bending tasks with maximum efficiency.

Technical Specifications

Key Features

- Robust heavy-duty frame
- Precision-engineered cutting blades
- Integrated hydraulic power system
- Adjustable back gauge for accuracy
- User-friendly control interface

Machine Type	Hydraulic Shearing and Bending Machine
Core Functions	Metal Cutting, Fold-Bending, Precision Shearing
