

Hydraulic Metal Sheet Shearing Machine

This hydraulic shearing machine is designed for cutting metal sheets. It features a control panel with digital display, adjustable blade clearance, and a robust frame for stability.

Overview

Precision Hydraulic Shearing

This hydraulic metal sheet shearing machine is engineered for high-performance metal fabrication. Featuring a robust frame design for maximum stability, it ensures consistent cutting accuracy across various sheet metal applications. The integrated digital control panel allows for precise adjustments, while the adjustable blade clearance feature offers versatility for different material thicknesses.

Technical Specifications

Cutting Capacity

6 mm

Max Thickness

3200 mm

Cutting Length

Model Number

QC11K-6x3200

Features

Key Features

- Hydraulic drive system
- Digital display control panel
- Adjustable blade clearance
- Robust structural frame

Suitable Applications

Metal Fabrication, Sheet Metal Cutting, Industrial Manufacturing
