

Hydraulic Metal Sheet Shearing Machine

This hydraulic shearing machine is designed for cutting sheet metal with precision and efficiency. It features a robust construction, ensuring stability and accuracy during operation.

ADDITIONAL IMAGES

Overview

Precision Hydraulic Metal Shearing

This hydraulic shearing machine is engineered for high-precision metal sheet cutting in industrial environments. It features a robust, stable construction with an advanced integrated hydraulic system for consistent and powerful shearing force. Designed for versatility, the machine includes adjustable shearing angles to minimize sheet distortion and a quick-adjust blade gap system for operational efficiency.

Technical Features

Hydraulic System	Advanced integrated hydraulic system
Blade Gap Adjustment	Manual handwheel adjustment
Blade Configuration	Rectangular, 4-edge reversible blades
Shearing Angle	Adjustable

Safety & Design

Construction

Robust • Heavy-duty • Industrial Grade

Safety Features

Integrated Safety Guard, Distortion Prevention
