Overview

Professional Hydraulic Lift Solution

This heavy-duty hydraulic motorcycle lift stand is engineered for efficient maintenance and repair tasks in professional workshops and garages. Featuring a foot-operated hydraulic pump, it allows for hands-free operation and smooth, controlled lifting. The unit is built from robust steel and includes essential safety features like a locking mechanism, ensuring stability and protection for both the motorcycle and the operator.

Construction & Design

Material	Heavy-duty steel
Key Features	Foot-operated hydraulic pump, Safety locking mechanism, Rubber-padded platform, Maneuverable wheels

Performance

Safety Mechanisms

- Safety locking mechanism to prevent accidental lowering
- Rubber pads to protect motorcycle frame from scratches

Operation	Hydraulic, foot-operated
Portability	Yes
