

Hydraulic Oil Reservoir for Off-Road Equipment

This hydraulic oil reservoir is designed for off-road machinery. It provides a reliable source of hydraulic fluid for heavy-duty applications.

ADDITIONAL IMAGES

Product Overview

Rotational molded nylon hydraulic tank designed for non-road machinery.

High-Performance Hydraulic Oil Reservoir

This hydraulic oil tank is engineered specifically for non-road machinery applications, offering exceptional durability in demanding environments. Manufactured using advanced rotational molding techniques with high-quality nylon, the reservoir ensures superior impact resistance, corrosion protection, and leak-proof performance. Designed for versatility, it accommodates various inserts and is suitable for construction, agricultural, and heavy-duty vehicle hydraulic systems.

Technical Specifications

Capacity	20 L
Material	Nylon
Working Temperature	-30°C to 120°C
Manufacturing Process	Rotational Molding

Features

Key Features	Corrosion Resistant, Leak-Proof, High Strength, Customizable Design
--------------	---

Application

Suitable Applications

- Construction Equipment
- Agricultural Machinery
- Heavy-Duty Vehicles
- Non-Road Hydraulic Units
