

Hydraulic Pallet Truck 2000kg Capacity

This hydraulic pallet truck is a robust and reliable material handling solution. It has a load capacity of 2000kg, adjustable fork width, and a safety overload valve.

Overview

Reliable Material Handling

The Hydraulic Hand Pallet Truck is a robust and reliable material handling solution designed for the efficient and safe movement of palletized goods. Featuring a durable steel frame and a high-quality hydraulic system, this truck offers smooth lifting and lowering operations. It is built to withstand heavy use in warehouses, factories, and distribution centers, ensuring long-lasting performance.

Performance Specifications

Load Capacity

2000 kg

Max Load Capacity

Safety Features

Safety Overload Valve, High-Strength Steel Frame

Design & Ergonomics

Design Highlights

- Ergonomic handle design
- Smooth lifting and lowering mechanism
- Excellent maneuverability in tight spaces
- Streamlined, aesthetic body design

Build Quality

Durable Steel • High-Quality Hydraulics
