

Hydraulic Pipe Cutter and Tongs Machine

Hydraulic pipe cutter and tongs machine for cutting and shaping pipes. This robust machine is designed for industrial applications, providing precise and efficient pipe processing.

Overview

Industrial Hydraulic Pipe Processing

This robust hydraulic pipe cutter and tongs machine is engineered for high-precision cutting and shaping in demanding industrial environments. Equipped with a powerful hydraulic system and adjustable tooling, it ensures consistent performance for heavy-duty pipe processing tasks. Designed for reliability, this machine is an essential asset for construction, plumbing, and large-scale manufacturing operations.

Technical Specifications

Model Series	UN-100/150
Power System	Hydraulic

Features

Key Features

- Hydraulic power system
- Adjustable cutting tools
- Adjustable shaping tools
- Heavy-duty construction

Applications

Suitable Industries	Construction, Plumbing, Manufacturing
