

Hydraulic Pipe Grooving Machine

This machine is designed for creating grooves on pipes and tubes. It uses a hydraulic pump to ensure efficient and consistent grooving.

Overview

Professional Hydraulic Pipe Grooving

The G12C hydraulic pipe grooving machine is engineered for high-performance industrial applications, offering precise grooving capabilities for various pipe materials including steel, stainless steel, and PVC. Equipped with a powerful 750W induction motor, it ensures quiet and steady operation at 24 rpm for consistent professional results. The machine features a robust frame and an adjustable depth setting, making it a reliable solution for both on-site installation and workshop fabrication needs.

Technical Specifications

Rated Power

750 W

Motor Power

24 rpm

Rotation Speed

Grooving Capacity

Pipe Type	Capacity Range
Schedule 10 (Steel/SS/PVC)	2" - 12"
Schedule 40 (Steel/SS/PVC)	2" - 8"

Physical Dimensions

Dimensions & Weight

- Dimensions: 80 x 46 x 81 cm
- Gross Weight: 145 kg
- Net Weight: 120 kg

Standard Equipment

Included Components

2-6 inch Schedule 10/40 Roll Set, 8-12 inch Schedule 10 Roll Set, Support Stand

Product Variants

Available Voltage Configurations

Code	Voltage	Frequency
12C20	220V	50Hz
12C10	110V	60Hz
