Product Overview

Industrial Hydraulic Power Solutions

This series of single-acting hydraulic power pack pumps is designed for high-performance industrial applications requiring two-speed operation. Built with a robust motor and protective housing, these units provide precise pressure control for powering hydraulic tools and heavy equipment. The range includes three versatile models capable of handling both low and high-pressure requirements efficiently.

Technical Specifications

Pressure Ratings

70 bar Low Pressure (LP)	700 bar High Pressure (HP)
------------------------------------	--------------------------------------

Model Comparison

Model	Oil Capacity (L)	Power (kW)	Weight (kg)
PE8DS	8	0.75	20
PE12DS	12	1.5	29
PE30DS	30	2.2	45

Operational Features

Supported Voltages

- 220V
- 380V

Pump Configuration

Single-Acting, Double-Speed, Axial Piston
