

Hydraulic Press Brake for Metal Forming

This hydraulic press brake is designed for precision metal forming tasks. Its hydraulic drive system ensures consistent and reliable bending force.

Product Overview

WC67Y Series Hydraulic Press Brake

The WC67Y series is a robust hydraulic press brake designed for high-precision metal forming applications. Built with a welded steel plate frame treated for stress relief, this machine ensures exceptional stability and long-term accuracy. It features hydraulic top-drive operation with stepless pressure adjustment and imported high-quality seals for superior reliability in industrial metal fabrication.

Technical Specifications

Operation Modes

- Inch
- Single cycle
- Continuous operation

Safety Compliance

Safe fence, Electric interlocker

Backgauge Adjustment

Motorized adjustment with manual fine-tuning and digital display

Model Variants

Standard Model Range

Model ID

WC67Y-40/2000

WC67Y-40/2500

WC67Y-63/2500

WC67Y-80/2500

WC67Y-80/3200

WC67Y-100/3200
