

Hydraulic Press Brake with Multi-Axis Back Gauge

This hydraulic press brake features a robust frame and a user-friendly control system. It is equipped with a multi-axis back gauge, safety light curtains, and a programmable logic controller (PLC) for automated operation.

Overview

High-Precision Hydraulic Bending Solution

This hydraulic press brake is engineered for high-volume production environments requiring precision and reliability. It features a robust frame construction paired with a sophisticated multi-axis back gauge system for highly accurate material positioning. Equipped with an advanced PLC and safety light curtains, it ensures both operational efficiency and operator protection during complex bending tasks.

Technical Specifications

Safety Systems

Safety Light Curtains

Bending Capabilities

High-Volume Production, Complex Bending, Precision Positioning

Control System

Programmable Logic Controller (PLC)

Back Gauge Configuration

Multi-Axis
