

Hydraulic Press for Metal Forming

This hydraulic press is designed for metal forming applications. It features a robust frame, a hydraulic cylinder, and a control system.

Overview

High-Performance Hydraulic Press

This hydraulic press machine is engineered specifically for demanding metal forming applications. Featuring a robust frame and a high-capacity hydraulic cylinder, it delivers precise pressing force for consistent results. It is an ideal solution for a variety of metalworking processes, including punching, bending, and stamping, ensuring reliability in industrial environments.

Technical Specifications

Core Components

- Robust structural frame
- High-pressure hydraulic cylinder
- Precision control system

Model Number	JL21G-45
Supported Processes	Punching, Bending, Stamping
