

# Hydraulic Pressure Gun for Industrial Applications

The HPG10 hydraulic pressure gun is designed for demanding industrial applications. Its durable construction withstands high pressures, while the ergonomic handle ensures comfortable, precise control.

## Overview

### Industrial Hydraulic Pressure Gun

The HPG10 Hydraulic Pressure Gun is a robust and reliable tool engineered for demanding industrial environments. Designed with durability in mind, it withstands high pressures and harsh operating conditions while maintaining consistent performance. Its ergonomic handle and trigger mechanism ensure precise control and comfortable operation, making it an essential tool for hydraulic system testing, cleaning, and maintenance tasks.

## Safety & Compliance

### Safety Warnings

- Danger: Do not point at human body
- Severe injury may result from misuse
- Includes trigger lock mechanism

## Key Features

### Operational Features

High Pressure Rated, Ergonomic Design, Trigger Lock, Industrial Grade

## Applications

### Typical Applications

Hydraulic System Testing • Industrial Cleaning • System Maintenance
