

Hydraulic Pump Gear Assembly

Gear assembly designed for use in hydraulic pumps and motors. It features three external spur gears mounted on a triangular plate.

Product Overview

Hydraulic Pump Gear Assembly

This hydraulic pump gear assembly is designed for high-performance power transmission within hydraulic systems. Featuring a three-gear planetary arrangement mounted on a durable triangular plate, this component is engineered for reliability in demanding mechanical environments. Its robust steel construction ensures long-term operational stability for industrial hydraulic applications.

Technical Specifications

Component Type	Hydraulic Pump Gear Assembly
Design Configuration	Planetary gear system with triangular mounting plate
Material	Steel, Industrial Grade
Production Date Mark	2005.08.30
