

Hydraulic Puncture Valve Assembly

This puncture valve assembly is designed for hydraulic applications. It allows for controlled fluid or gas flow within a system.

Product Overview

Precision Hydraulic Control

This hydraulic puncture valve assembly is engineered for demanding industrial and marine applications. Designed for reliability in high-pressure fluid or gas control, the unit features a durable, corrosion-resistant metallic construction. It provides essential functionality for regulating flow within complex mechanical systems, ensuring precise operation in diverse technical environments.

Compatibility

2-Stroke Engine Support

S26MC, L35MC, S35MC, L42MC, S42MC, S46MC-C, L50MC, S50MC/-C, L60MC, S60MC/-C, L70MC, S70MC, L80MC, S80MC, K80MC/-C

4-Stroke Engine Support

L16/24, L20/27, L23/30, L23/30A, L28/32, L28/32A, L28/32H

Design Specifications

Design Features

- Cylindrical body
- Multiple ports and seals
- Top connection with internal threading
- Hexagonal base for wrenching

Material

Corrosion-resistant metal (stainless steel or equivalent)
