

Hydraulic Rams and Cylinders

These hydraulic rams and cylinders are suitable for various lifting and pushing tasks. The cylinders feature heavy-duty construction, chrome-plated piston rods, and threaded collars for easy mounting.

Product Overview

Professional Hydraulic Performance

These hydraulic rams and cylinders are engineered for demanding lifting and pushing tasks in construction, automotive repair, and industrial maintenance. Featuring heavy-duty construction and high-quality chrome-plated piston rods, they provide the reliability required for intensive professional environments. The design includes versatile mounting options via threaded collars, ensuring compatibility with a wide range of industrial setups.

Technical Specifications

Key Features

- Heavy-duty construction
- Chrome-plated piston rods
- Threaded collars for mounting

Cylinder Configuration

Single-acting, Double-acting

Applications

Industry Usage

Construction • Automotive Repair • Industrial Maintenance
