Overview

Professional Vegetation Management

The HRM220 is a high-performance hydraulic reach mower designed for agricultural land-clearing and vegetation maintenance. Engineered for versatility, it excels at cutting grass, shrubs, and prunings in banks, ditches, and hard-to-reach areas. Its compact arm design allows for flush cutting without obstructing traffic, while the robust hydraulic system ensures reliability in demanding field conditions.

Technical Specifications

Compatible Tractor Power

80 HP

Minimum Power

130 HP

Maximum Power

Hydraulic System Features

- Double high-performance hydraulic system
- Hydraulic cushioning with 100° rotation
- Floating head system
- High-performance cast iron pump

Construction Quality

Cast iron pump, Grouted pins, Grinded bushings, High-quality steel

Operational Features

Safety & Control

- In-cab remote control system
- Front and back cutting guards
- Height adjustable roller
- Compact arm design for flush cutting

Suitable Applications

Roadside maintenance • Ditch clearing • Orchard trimming • Agricultural land clearing
