

Hydraulic Rebar Cutter

This hydraulic rebar cutter is a powerful and efficient tool designed for cutting steel rebar. It provides clean and precise cuts, ensuring accuracy and safety on construction sites.

Product Overview

Professional Hydraulic Rebar Cutter

The RC-16 electro-hydraulic steel cutter is a high-performance tool engineered for precision and efficiency on construction sites. Designed to handle rebar ranging from 4mm to 16mm, this compact machine features a powerful hydraulic mechanism that ensures clean cuts with minimal operator effort. Its durable construction and portable design make it an essential asset for infrastructure, demolition, and general construction projects.

Technical Specifications

Cutting Capacity

| | | |
|------------------------------------|-----------------------------------|-----------------------------|
| 16 mm Max Rebar Diameter | 4 mm Min Rebar Diameter | 3 s Cutting Speed |
|------------------------------------|-----------------------------------|-----------------------------|

Power Requirements

| Voltage (V) | Wattage (W) |
|-------------|-------------|
| 220V | 690W |
| 110V | 760W |

Physical Dimensions

Dimensions and Weight

- Machine Weight: 8 kg
- Gross Weight: 13 kg
- Machine Size: 460 x 270 x 115 mm
- Carton Size: 510 x 230 x 150 mm

Certifications

| | |
|------------|----------|
| Compliance | CE, ROHS |
