

Hydraulic Release Clutch Bearing

10x40x45mm

This hydraulic release clutch bearing has a 10mm inside diameter, 40mm outside diameter, and 45mm thickness. It is designed for reliable clutch engagement and disengagement in automotive applications.

Product Overview

Hydraulic Release Clutch Bearing

This hydraulic release clutch bearing is engineered for heavy-duty applications, ensuring smooth and reliable clutch engagement and disengagement. Featuring a robust construction, it is designed for extended service life and consistent performance. The unit incorporates a hydraulic actuator for precise control, making it an ideal choice for commercial vehicles and industrial machinery.
