

Hydraulic Release Clutch Bearing

This hydraulic release clutch bearing is designed for automotive applications. It facilitates smooth and efficient clutch engagement, reducing wear on the transmission system.

Product Overview

Hydraulic Release Clutch Bearing

This hydraulic release clutch bearing is engineered for heavy-duty applications, facilitating smooth and efficient clutch engagement and disengagement. Designed to reduce wear and tear on the transmission system, it features a robust construction for enhanced reliability in demanding operating conditions. The unit is built for consistent performance and extended service life, helping to minimize downtime and maintenance costs in professional automotive environments.

Model Number	6482000087
